

# BOBIL VANS WASTE WATER DRAIN KIT

## INSTALLATION INSTRUCTIONS

## What comes in the box?

Thank you for purchasing this waste water drain kit! In this kit you will receive everything you need to drain water from your sink and shower into your underslung waste tank.

### Kit Contents – Ducato Kit

- 1 ¼" or 1 ½" to 25mm Barb Fitting
- 25mm Waste Pipe (2m)
- 25mm Wire Clamps (x2)
- 3/4" Male to 25mm Barb
- 25mm Floor Grommet
- 25mm P-Clips (x2)

### Kit Contents – Sprinter Kit

- 1 ¼" or 1 ½" to 25mm Barb Fitting
- 25mm Waste Pipe (3m)
- 25mm Wire Clamps (x2)
- 25mm Floor Grommet
- 25mm P-Clips (x3)

## Installation

1. If you are using the 1 ¼" fitting, wrap some PTFE around your sink/shower drain thread 8-10 times. If you have the 2-part 1 ½" fitting, assemble the fitting and insert the washer into the threaded section. Then screw the 1 ¼" or 1 ½" to 25mm barb fitting onto your sink or shower fitting.
2. Attach one end of the 25mm pipe with the wire clamp to the 25mm barb.
3. Locate your grey water tank and drill a 36-38mm hole through the floor of your van. Insert the floor grommet and pass the 25mm pipe down and through this hole.
4. Direct the hose towards your grey tank and cut to length. Attach with the included P-Clips to the underside of your van, keeping it tightly tucked up.
5. SPRINTER KITS - With our Sprinter tank kits, these come with a 25mm barb so simply attach this pipe to the barb with the 2<sup>nd</sup> wire clamp.
6. DUCATO KITS - wrap PTFE tape around the threads of the 25mm barb fitting, and screw this into the hole located on the top of the Ducato waste water tanks. If you don't use both holes, then you will need a ¾" bung to plug up the other hole.

We would love to know what you think! Please let us know by leaving a review through the link sent through when you made your purchase, or email us at [info@bobilvans.co.uk](mailto:info@bobilvans.co.uk)!
